

Micro-ATX and Mini-ITX PC Case

This PC case is a compact and efficient enclosure designed for micro-ATX and mini-ITX motherboards. It features optimized airflow with front and rear ventilation and supports multiple hard drives and SSDs.

Overview

Compact Performance Enclosure

The Micro Series 1213 PC Case is a highly efficient enclosure engineered specifically for micro-ATX and mini-ITX motherboard form factors. It combines a sleek, professional black aesthetic with optimized thermal management through dedicated front and rear ventilation paths. Designed for ease of use, the tool-less assembly system significantly reduces installation and maintenance time for system builders.
