

Micro Cable Stripping Machine

This micro cable stripping machine is designed for accurate and efficient wire stripping. The device is ideal for processing various cable types, ensuring consistent results with minimal effort.

Overview

Precision Micro Cable Stripping Solution

The ZDBX-36R is a high-precision micro cable stripping machine engineered for industrial and laboratory wire processing. It offers adjustable stripping parameters and a digital control interface to ensure consistent, accurate results. With its compact footprint and safety-focused design, it is an essential tool for achieving professional-grade cable preparation with minimal effort.

Technical Specifications

Suitable Environments

- Industrial environments
- Laboratory settings

Control Method	Digital
Safety Features	Safety Enclosure, Digital Control
