

Micro-Fine Abrasive Pads

Micro-fine abrasive pads are designed for precision grinding and polishing applications. These pads offer consistent performance and are suitable for both manual and machine-assisted operations, making them ideal for achieving smooth and even surfaces on a variety of materials.

Product Overview

Precision Finishing Solutions

These micro-fine abrasive pads are engineered for high-precision grinding and polishing tasks. Designed to deliver consistent performance, they ensure smooth, even surface finishes across a wide range of industrial materials. Versatile in application, these pads are suitable for both manual and machine-assisted operations, making them an essential tool for quality surface preparation.

Technical Specifications

Finish Quality

Micro-Fine • Precision Grade

Primary Uses

- Precision Grinding
- Surface Polishing
- Surface Finishing

Application Compatibility

Manual Operation, Machine-Assisted Operation
