

Micro Precision Electric Grinder

This electric grinder is designed for detailed work on materials like wood and metal. It is suitable for engraving, carving, polishing, and drilling in applications such as jewelry making, circuit board manufacturing, and dental work.

Product Overview

Precision Electric Grinder

This micro precision electric grinder is an versatile tool engineered for high-accuracy tasks across various industries. It is designed to handle intricate material removal and shaping, making it suitable for applications ranging from jewelry engraving and mould polishing to circuit board drilling and denture finishing. With features like variable speed control and hands-free foot pedal operation, it offers the control and convenience required for professional-grade work.

Applications

Primary Applications

Nail Art, Wood Engraving, Craft Carving, Denture Polishing, Artificial Limb Polishing, Jewelry Engraving, Mould Polishing, Precision Parts Carving, Circuit Board Drilling

Technical Features

Control Features

- Variable speed control
- Foot pedal for hands-free operation
- Collet chuck handpiece

Design

Compact
