

Micro Precision Electric Grinder for Crafting and Polishing

This electric grinder is designed for precision work on crafts, dentures, and molds. It features variable speed control, enabling detailed material removal and shaping.

Overview

Precision Grinding Solution

This micro precision electric grinder is engineered for intricate tasks requiring high levels of control and finesse. It is an ideal tool for detailed crafting, professional nail care, denture and artificial limb polishing, as well as precision mould polishing. The system features a variable speed control unit and a flexible handpiece, ensuring consistent performance across a wide range of delicate material removal and finishing applications.

Applications

Primary Applications

Nail Care, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing

Technical Features

System Components

- Handpiece
- Flexible connection cord
- Control unit with power switch
- Speed adjustment knob

Control Type

Variable speed control
