

Micro Submersible Water Pump

This micro submersible pump is designed for drainage, irrigation, and water transfer. Its durable construction includes a cast iron or aluminum pump body and impeller, ensuring long-lasting performance.

Product Overview

Compact Submersible Performance

The QDX micro submersible pump is a compact and efficient solution designed for versatile water management tasks, including drainage, irrigation, and general water transfer. Built with a durable cast iron or aluminum body and impeller, it ensures long-lasting performance even in challenging environments. Its submersible design allows for seamless installation and reliable operation in confined spaces, making it ideal for both clean and slightly dirty water applications.

Certifications & Standards

Quality & Compliance

ISO 9001, SGS, RoHS, CCC, CE

Technical Specifications

Suitable Water Types

- Clean Water
- Slightly Dirty Water

Key Features

Submersible • Compact Design • High Flow Rate

Construction Material

Cast Iron or Aluminum
