

# Micro-Surfacing Asphalt Slurry Seal Paver

This slurry seal paver is an automatic machine featuring a computer-aided touch panel operating system for easy operation. It employs advanced electricity/emulsion ratio control technology.

## ADDITIONAL IMAGES

## Product Overview

### Smart Micro-Surfacing Paver

The HRF-100 is a smart micro-surfacing paver designed for applying modified emulsified asphalt slurry seals. Engineered for precision and efficiency, it ensures consistent material distribution and optimal compaction to create durable, smooth pavement surfaces. This machinery is suitable for a wide range of road maintenance and construction applications, including highways, urban streets, and airport runways.

## Technical Capabilities

### Key Features

- Robust chassis design
- Precise material metering
- Efficient mixing system
- Advanced automated control systems
- Real-time parameter monitoring

### Suitable Applications

Highways, Urban Streets, Airport Runways, Road Maintenance

## Performance Metrics

### Performance Highlights

**100 HRF**
