

Micro-USB to HDMI Adapter

This MHL (Mobile High-Definition Link) adapter connects a smartphone or tablet to an HDMI-equipped display. It supports high-definition video and audio, enabling mobile content viewing on a larger screen.

Overview

High-Definition Mobile Connectivity

This MHL adapter provides a seamless bridge between your mobile devices and high-definition displays. Supporting the MHL 1.0 specification, it delivers high-quality 1080p video and digital audio output while simultaneously charging your connected device. Its compact design ensures portability, making it an ideal solution for enjoying mobile content on larger screens with full remote control integration.
