

# Microcomputer Electric Rice Cooker

This microcomputer electric rice cooker is designed for household use. The kitchen appliance automates the rice cooking process and offers various cooking modes and features for optimal results.

## Overview

### Smart Cooking Technology

This microcomputer-controlled electric rice cooker combines international fashion design with advanced cooking technology. It features multiple cooking modes including fast, ultrafast, and standard rice cooking, alongside specialized functions for porridge, soup, and reheating. Designed for the modern kitchen, the unit incorporates micro-pressure steam valve technology to enhance internal pressure, ensuring better nutrient retention and superior moisturizing effects.

## Design & Build

Casing Material	Durable plastic
Handle Features	Humanized design, Antibacterial material

## Cooking Functions

### Available Cooking Modes

- Standard Rice
- Fast Rice
- Ultrafast Rice
- Porridge
- Soup
- Reheat

### Preset Timer Options

4 Hours • 8 Hours • 12 Hours

## Performance

### Key Performance Benefits

- Precise microcomputer control
- Enhanced nutrient retention
- Antibacterial properties
- Time-saving reheat function

Pressure System	Micro-pressure steam valve
