Product Overview

Efficient Cleaning Solution

The Microfiber Duster Mop Nozzle is designed to streamline cleaning tasks by combining vacuum suction with microfiber dusting capabilities. Featuring a patented dual-nozzle system, it maintains consistent suction whether moving forward or backward. The integrated microfiber pad, complete with side loops, captures fine dust that standard vacuums often miss, while the lightweight, swivel-head design ensures easy maneuverability.

Technical Specifications

Material	Microfiber
Suction Technology	Patent Suction Nozzles, Bi-directional Suction
Maneuverability	Lightweight with swivel head

Maintenance

Maintenance

- Detachable pad
- Machine washable pad
