

Microprocessor

Microprocessors are integrated circuits that perform a variety of functions. They process instructions and manage data flow within electronic devices.

Overview

Versatile Welding Solution

The WSME315 is a high-performance inverter welding machine engineered for both TIG and MMA welding processes. Utilizing advanced IGBT technology, it delivers stable and efficient welding arcs suitable for a variety of metals, including steel, stainless steel, and aluminum. Designed for workshop environments, this unit features precise parameter control and robust safety protections for reliable operation.

Technical Specifications

Compatible Materials

- Steel
- Stainless Steel
- Aluminum

Welding Processes	TIG, MMA
Technology	IGBT Inverter

Features & Controls

Key Features

Thermal Overload Protection • Robust Cooling System • Digital Display • Mobile Design

Control Interface	Front panel knobs with digital display
