

Microscope LED Light with Adjustable Intensity

This microscope light provides bright, even illumination for microscopy applications. It features a flexible light guide for precise positioning and adjustable intensity control.

Overview

Professional Microscope Illumination

This microscope light source is engineered to provide bright, consistent, and even illumination for demanding microscopy applications. Featuring an adjustable intensity control and a flexible light guide, it allows for precise positioning to enhance visibility and detail during observations. Built for reliability, this unit is an essential tool for laboratories and industrial inspection environments.

Technical Specifications

Power Requirements	220/110VAC 60HZ
Bulb Type	21V 150W Halogen
Minimum Bulb Life	1000 Hours
Max Temperature	3200 K

Mechanical Details

Output Port Diameter	5/8 inch
Unit Weight	7 kg

Safety & Compliance

Fuse Rating	2 A
