

Microwave Motion Sensor Switch for Lighting Control

This microwave motion sensor switch offers automatic lighting control using motion detection. It is suitable for corridors, pathways, porches, and stairwells.

Product Overview

Smart Lighting Control

The AM-RS-04F is a high-efficiency microwave motion sensor switch designed for automated lighting control in diverse environments. By detecting movement, it ensures lights are only active when necessary, significantly enhancing energy efficiency in corridors, stairwells, and warehouses. Its compact, retrofit design allows for easy installation, providing a seamless solution for modern, automated building management.

Technical Specifications

Input Voltage	225 V
Frequency	50/60Hz
Maximum Load	35 W

Detection Capabilities

Holding Time

15 sec
Min Time

20 sec
Max Time

Detection Angle	160° x 360°
Sensing Distance	10 m

Applications

Suitable Environments	Corridors, Pathways, Porches, Stairwells, Toilets, Warehouses, Garages
-----------------------	--

Installation

Installation Caution	Avoid installing near metal objects to ensure optimal sensor performance.
