

Microwave Oven and Induction Cooker Control Board

Control board designed for microwave ovens and induction cookers. It manages power levels, cooking time, and safety features.

Product Overview

Integrated Control Solution

This advanced control circuit board is engineered for seamless integration into microwave ovens and induction cookers. Designed for precision, it manages critical appliance functions including power levels, cooking duration, and essential safety protocols. The board features a high-visibility four-digit LED display, providing users with clear feedback on time and temperature settings.

Technical Details

Board Components

- Integrated Circuits (ICs)
- Resistors
- Capacitors
- Diodes
- Four-digit LED Display
- Interface Connectors
