

Microwave Oven and Induction Cooker HID Lamp

High-intensity discharge (HID) lamp designed for use in microwave ovens and induction cookers. It features a clear glass envelope, internal electrodes, and a black base for secure mounting.

Product Overview

High-Performance Illumination

This high-intensity discharge (HID) lamp is specifically engineered for integration into microwave ovens and induction cookers. Featuring a clear glass envelope and robust internal electrodes, it ensures consistent and bright illumination within cooking appliances. The design includes a secure black base for reliable mounting and long-term durability in high-heat environments.

Technical Specifications

Lamp Type	High-Intensity Discharge (HID)
Compatible Appliances	Microwave Oven, Induction Cooker

Design & Construction

Key Features

- Internal electrodes
- Secure mounting base
- High-heat resistant glass

Envelope Material	Clear Glass
Base Color	Black
