Overview

Versatile Soil Preparation Tool

The Middle Buster/Subsoiler combines strength and durability to offer a multi-purpose tool for farm, field, and garden maintenance. Featuring a tubular steel shank and heavy-duty frame construction, it is designed for laying off rows, digging potatoes, and general field preparation. Additionally, the subsoiler point allows for ripping sod and loosening compacted soil to promote better plant growth.

Technical Specifications

Compatibility Notes

- Not compatible with quick hitch systems
- Designed for subcompact tractors

Hitch Category

Category 1 (Subcompact)

Maximum Tractor Power

40 HP

Construction

Construction Materials

Thick-walled tubular steel, Heavy-duty steel angle, Heat-treated furrower, Heat-treated subsoiler point

Certifications

Compliance

CE Certified

Applications

Primary Applications

- Laying off rows
- Digging potatoes
- Pointing a ditch
- General field preparation
- Ripping sod
- Loosening compacted soil
