

MIG Welding Machine 160S 180S 200S

This is a compact MIG welding machine suitable for light to medium duty welding applications. It features adjustable amperage and voltage settings for optimal welding performance on various materials.

Overview

Professional MIG Welding Solution

The MIG Welding Machine series (160S, 180S, 200S) is designed for versatile light-to-medium duty welding applications. Engineered for both professional welders and hobbyists, these units provide adjustable amperage and voltage settings to ensure optimal performance across various materials. With a robust build and intuitive controls, this machine offers a reliable solution for consistent, high-quality welds.

Technical Specifications

Performance Metrics

160 A

Base Model Amperage

180 A

Mid-Range Amperage

200 A

High-Range Amperage

Available Models

160S, 180S, 200S

Features

Key Features

- Adjustable amperage settings
- Variable voltage control
- Robust, durable construction
- Intuitive control interface
- Suitable for various materials
