

MIG/MAG Welding Machine

This is a compact and portable MIG/MAG welding machine with adjustable settings. It is designed for various welding applications and provides a stable arc for an efficient welding process.

Overview

Professional MIG/MAG Welding Solution

This portable, single-phase welding machine is designed for versatility and reliability in various welding environments. It supports both Flux (Gasless) and MIG/MAG welding processes, ensuring adaptability for different project requirements. Equipped with fan-cooling and thermostatic protection, the unit is built for consistent performance and durability during operation.

Technical Specifications

Power Type	Single-phase, Direct Current (DC)
Cooling System	Fan-cooled
Protection Features	Thermostatic Protection

Compatibility

Supported Welding Modes

- MIG/MAG Welding
- Flux (Gasless) Welding

Included Accessories

Standard Accessories

- MIG Torch
- Earth Clamp
- Welding Cable
- Brush/Hammer
- Protective Mask

Optional Accessories

Regulator
