

MIG/MMA Inverter Welding Machine

This inverter welding machine is designed for CO2 gas protection welding. It supports both MIG and MMA welding processes and features adjustable voltage, current, and induction for precise control.

Overview

Versatile Welding Solution

This MIG/MMA Inverter Welding Machine is a robust tool designed for both CO2 gas protection welding (MIG) and Manual Metal Arc (MMA) processes. Engineered for professional versatility, it features adjustable voltage, current, and induction settings to provide precise control for various welding applications. The unit is equipped with clear digital displays for real-time monitoring of welding parameters, ensuring reliable and consistent performance.

Technical Specifications

Rated Current

180 A

Max Current

Control Features

- Adjustable Voltage
- Adjustable Current
- Induction Adjustment
- Digital Display for Voltage
- Digital Display for Current

Welding Processes	MIG, MMA
Model Number	MIG/MMA-180
Weight	21 kg
