

Millet Grain Processing Machine

This millet milling machine is designed for efficient processing of millet grains. It features a multi-stage system including cleaning, dehulling, polishing, and grading to ensure high-quality millet flour production.

Overview

Millet Grain Processing System

This millet grain processing machine is designed for efficient, multi-stage grain handling, incorporating cleaning, dehulling, and whitening processes. The system features a robust, integrated design including elevators and a dedicated electrical control cabinet for precise operational management. Engineered for consistent output and reliability, it is suitable for professional processing environments looking to optimize grain quality.

Performance

Capacity

10 t/d

Capacity

Power Consumption

38.75 kw

Dimensions

Overall Dimensions (L x W x H)

7500 x 1900 x 3721 mm

System Components

Included Equipment

Component Name	Quantity
40 Combined Cleaner	1
50 Paddy Combined Cleaner	1
10 Husker	1
11 Rice Whitener	2
Elevators	5
Electrical Control Cabinet	1
