

# Milling and Drilling Machine

Precision milling and drilling machine designed for versatile machining operations. Features a robust construction for stability and accuracy, with adjustable worktable and spindle speed.

## Overview

### Versatile Precision Machining

This precision milling and drilling machine is engineered for versatile machining operations, offering robust construction to ensure stability and high accuracy. Designed for metalworking and manufacturing environments, it features an adjustable worktable and variable spindle speeds to accommodate a wide range of materials. Its reliable performance makes it an essential tool for workshops requiring consistent and precise drilling and milling results.

## Technical Specifications

### Key Features

- Robust construction for stability
- High precision machining capability
- Adjustable worktable
- Variable spindle speed control

### Suitable Applications

Metalworking • Manufacturing • General Machining

<b>Model Series</b>	ZX30, ZX45
<b>Machine Type</b>	Milling and Drilling Machine
