

Mine DC Traction Motor

This DC traction motor is designed for mine applications. It is built with robust construction and a compact design.

Product Overview

Rugged Power for Mining Operations

The ZQ series DC traction motor is specifically engineered for demanding mining applications, offering reliable performance in harsh underground or surface environments. Its robust construction utilizes high-quality components to ensure exceptional durability and an extended operational lifespan. Designed with a compact footprint, the motor features an efficient cooling system and convenient maintenance access, making it an ideal choice for diverse mining vehicles and heavy-duty equipment.

Technical Specifications

Motor Type	DC Traction Motor
Series	ZQ

Key Features

Design Features

- Compact design
- Efficient cooling system
- Easy maintenance access
- High-quality robust components

Application

Suitable Applications	Mining Vehicles, Mining Equipment, Underground Transport, Traction Systems
-----------------------	--
