

# Mine Site Construction

This construction project is located on a mine site. It features industrial facilities, administrative buildings, and a specialized dome-shaped structure.

## Project Overview

### Industrial Infrastructure Excellence

This construction project demonstrates elite engineering standards, having achieved the prestigious Luban Prize for construction excellence. The site has also been formally recognized as a national environmental protection project. It represents a sophisticated blend of administrative, residential, and industrial facilities designed for large-scale operations in a natural setting.

### Industry Recognition

Luban Prize, National Environmental Protection Project

## Site Characteristics

### Facility Composition

- Administrative buildings
- Residential structures
- Industrial processing facilities
- Specialized storage domes
