

Mineral Stone Water Purifier with UV Sterilizer

This water purifier uses mineral stone technology to filter water, adding beneficial minerals and trace elements. An integrated ultraviolet sterilizer ensures the drinking water is sanitary and safe.

ADDITIONAL IMAGES

Product Overview

Natural Mineral Health Care Solution

This advanced water purification system utilizes proprietary stone-based filtration technology to infuse drinking water with essential minerals and trace elements. Beyond standard filtration, the system incorporates strong magnetization to improve water solubility and permeability for better hydration. An integrated ultraviolet sterilization module at the outlet provides an extra layer of safety, ensuring every drop meets strict sanitary requirements.

Technical Specifications

Flow Rate

1000 L/h

Flow Rate

Input Water Pressure

2-4 bar

Power Consumption

500 W

Physical Dimensions

Dimensions (H x W x D)

1200 x 800 x 1500 mm

Weight

250 kg

Filtration Technology

Filtration Stages

- Natural Stone Soaking and Filtering
- Sediment Filter
- Activated Carbon Filter
- Reverse Osmosis Membrane
- Strong Magnetization Module
- UV Sterilizer

Compliance and Quality
