

Mineral Water Bottling System

This mineral water bottling system provides a complete bottling solution for efficient and hygienic filling of mineral water into bottles. The integrated system incorporates rinsing, filling, and capping processes into a single automated unit.

Product Overview

Comprehensive Bottling Solution

This Mineral Water Bottling System integrates washing, filling, and capping into a single, highly efficient machine designed for non-carbonated liquids like mineral and pure water. Utilizing advanced PLC control technology and high-quality international components, it ensures reliable operation and superior hygiene standards. The hanging-type conveying structure allows for quick and convenient mold changes, significantly improving production flexibility and reducing labor requirements.

Key Features

Compatible Liquids

- Mineral Water
- Pure Water
- Wine

Core Capabilities

Automated Washing, Precision Filling, Secure Capping, PLC Control, Hanging-type Conveying

Technical Specifications

Washing Pressure

2.5 kg/cm²

Suitable Bottle Specifications

Diameter: 50-110mm, Height: 170mm, Volume: 330-2250ml

Performance Data

Model Performance Table

Model	Heads (W/F/C)	Capacity (B/H)	Motor Power (kw)
CGF12125	12-12-5	2000-4000	2.2
CGF18186	18-18-6	5000-7000	2.2
CGF24248	24-24-8	8000-12000	3
CGF323210	32-32-10	12000-15000	5.5
CGF404012	40-40-12	16000-20000	7.5
CGF505012	50-50-12	20000-24000	11
CGF606015	60-60-15	25000-30000	15
CGF808020	80-80-20	35000-40000	19
