

# Mini 12V DC Submersible Water Pump 240LPH

This mini DC submersible water pump is designed for fountains and aquariums. It operates on 12V DC power, delivering a flow rate of 240 liters per hour with a maximum lift of 3 meters.

## ADDITIONAL IMAGES

## Product Overview

### Compact High-Performance Submersible Pump

This mini 12V DC submersible water pump is engineered for versatile applications, including fountains, aquariums, and hydroponic circulation systems. It features a highly efficient design with a 240 LPH flow rate and a 3-meter maximum static head, all while consuming just 4.2W of power. Built for durability and long-term reliability, this unit offers an operational lifespan exceeding 30,000 hours, making it an ideal solution for space-constrained water transfer needs.

## Technical Specifications

Model Number	DC30A-1230
Operating Voltage	12 V
Max Load Current	0.35 A

## Performance Metrics

### Key Performance Metrics

**240 L/H**  
Max Flow Rate

**3 M**  
Max Static Head

**4.2 W**  
Power Consumption

## Durability and Usage

Operational Lifespan	> 30,000 hours
Recommended Applications	Fountains, Aquariums, Hydroponics, Water Circulation
