

# Mini Ball Valve with Chrome-Plated Brass Body

This compact ball valve is designed for shut-off and control applications. It features a chrome-plated brass body, ensuring corrosion resistance and durability.

## Overview

### Compact Shut-Off Solution

This mini ball valve is engineered for efficient shut-off and flow control in compact spaces. Featuring a durable chrome-plated brass body, it offers excellent corrosion resistance for long-term reliability. The integrated red handle provides intuitive operation and clear visual indication of the valve's current position.

## Technical Specifications

### Handle Color

Red

### Body Material

Chrome-Plated Brass

### Connection Type

Female NPT

### Suitable Applications

Shut-off, Flow Control, Low-Pressure Systems

## Performance Features

### Key Benefits

- Corrosion resistant finish
- Compact design for tight spaces
- Easy visual position indication
- Leak-proof threaded connection
