Overview

Versatile Precision Tooling

This mini electric rotary tool kit is engineered for precision grinding, engraving, carving, polishing, and cutting tasks. It features a high-performance motor with variable speed control, allowing users to adapt the tool to various materials and applications. Designed with user convenience in mind, the kit includes a flexible shaft for tight spaces and an external carbon brush design for easy maintenance.

Performance

Rotational Speed

8000 RPM

Min Speed

35000 RPM

Max Speed

Power Consumption

180 W

Speed Adjustment

6-gear stepless speed adjustment

Electrical

Supply Voltage

220V~50/60Hz

Features

Design Highlights

- Axis lock for easy accessory changes
- External carbon brush design
- Concaving on-off switch to prevent accidental operation
- Heat radiation vents
- Integrated storage hook

Certifications

CE, Intertek, GS, ROHS

Accessories

Included Components

- Grinding stones
- Sanding bands
- Polishing wheels
- Cutting discs
- Flexible shaft attachment
