Overview

Compact Nutrient-Preserving Slow Juicer

The ECO-SJ001 is a compact 60W masticating slow juicer designed for maximum nutrient retention through low-speed extraction. It features a specialized juice and dregs segregation system to ensure high-purity juice without the need for added water. Its portable, USB-rechargeable design and one-button operation make it an ideal solution for fresh, healthy juice in any kitchen environment.

Performance & Technology

Core Performance

60 W Power Output	235 ml Juice Capacity	5 V Operating Voltage
-----------------------------	---------------------------------	---------------------------------

Extraction Method	Low-speed masticating technology for minimal oxidation
Key Features	Dregs & Juice Segregation, High Purity Juice, No Water Added, Ultra Large Diameter Feed Chute, Entire Squeezing

Design & Build

Available Colors

Blue • White

Material	PP (Polypropylene)
Operation Type	One-button Start/Stop

Logistics & Dimensions

Physical Specifications

Property	Value
Dimensions	323 x 148 x 110 mm
Net Weight	1.15 kgs
Charging	USB Charge Cable (DC 5V)

Bulk Packaging

- 8 pieces per Carton (CTN)
- 20GP Container Capacity: 2576 pieces

Accessories

Included in Box

- Pushing Rod
- Dregs Tank
