

Mini Electric Wire Rope Hoist

This mini electric wire rope hoist is designed for lifting and positioning heavy objects. It features a durable construction, powerful motor, and remote control for convenient and safe operation.

Product Overview

High-Performance Mini Electric Wire Rope Hoist

This fast-type mini electric wire hoist is engineered for efficient lifting and precise positioning of heavy objects across industrial and workshop environments. Designed with a compact, portable form factor, it offers high-strength steel wire rope durability and reliable motor performance. Safety is prioritized through an integrated limit switch, while the included remote control ensures convenient operation from a distance.

Technical Performance

Lifting Speed

10 m/min

Fast Lifting Speed

Safety Features

Safety Limit Switch, High-Strength Steel Rope, Remote Control Operation

Applications

Suitable Environments

- Workshops
- Garages
- Construction Sites
- Industrial Settings
