

Mini Electric Wire Rope Hoist

This mini electric hoist is designed for various lifting applications. It features robust construction, a user-friendly control pendant, a safety hook, and a wire rope winding mechanism.

Product Overview

Mini Electric Wire Rope Hoist

The mini electric wire rope hoist is a versatile lifting solution available in both fixed and running configurations, designed for horizontal dragging and vertical lifting tasks up to 1200 kg. Engineered with a high-accuracy reduction box for quiet operation and a reliable copper motor, this hoist ensures both efficiency and durability in demanding environments. Safety is prioritized through an integrated limit device and aircraft-grade anti-rotation wire rope, making it a dependable choice for workshops and construction sites.

Key Features

Build Quality

Copper Motor • ABS Anti-Corrosion Parts • High-Accuracy Reduction Gear • Aircraft Anti-Rotation Rope

Certifications

TUV, CE, GS

Technical Specifications

Electrical Requirements

220 V

Rated Voltage

50 Hz

Frequency

40 IP

Protection Grade

Performance Data

Model	Capacity (Single/Double)	Lifting Height	Power
PA200	100/200kg	12	480
PA400	200/400kg	12	950
PA600	300/600kg	12	1200
PA800	400/800kg	12	1300
PA1000	500/1000kg	12	1600
