

Mini-ITX PC Case

This compact PC case is designed for Mini-ITX motherboards, offering a sleek and space-saving solution. It features optimized ventilation and supports standard components, making it suitable for both home and office environments.

Overview

Compact ITX Solution

The ITX Series 11102 is a compact and sleek PC case designed specifically for Mini-ITX motherboards. Its small form factor makes it an ideal choice for space-saving builds in both home and office environments without compromising on functionality. Featuring a minimalist design and durable construction, this chassis supports standard components like low-profile CPU coolers and SFX power supplies while ensuring efficient cooling.
