

Mini Oilless Air Compressor

This mini air compressor features a quiet-running, die-cast aluminum diaphragm pump head. It is powered by a 75 watt electric motor and suitable for most air brushes.

Overview

Mini Oilless Air Compressor

This compact and portable air compressor features a durable die-cast aluminium diaphragm pump head, designed for clean air delivery in various pneumatic applications. Powered by a 120-watt motor, it is specifically engineered for quiet operation and ease of maintenance. Ideally suited for airbrushing and other light-duty tasks, it provides a reliable and oil-free solution for professional users.

Technical Specifications

Motor Power

120 W

Power Rating

0.125 HP

Horsepower
