

Mini Pneumatic Die Grinder

This mini air die grinder is a versatile pneumatic tool for grinding, polishing, and deburring. Its compact size makes it ideal for intricate work in automotive repair, metalworking, and woodworking.

Overview

Compact Industrial Performance

This mini pneumatic die grinder is designed for precision tasks in tight spaces, offering a lightweight build that prevents user fatigue during extended operation. Engineered with an industrial-grade P6 bearing and a high-precision chuck, it delivers stable, high-speed performance for demanding metalworking and automotive applications. The tool features an integrated safety trigger mechanism and a silencer cover to ensure both operational safety and a quieter working environment.

Performance Specifications

Free Speed	25000 RPM
Motor Structure	Four-blade structure

Technical Details

Compatible Chuck Sizes

- 3
- 6

Bearing Grade	Industrial P6
---------------	---------------

Features

Included Accessories

- 3mm chuck
- 6mm chuck
- Special wrench

Key Features	Lightweight, Low Vibration, Safety Trigger, Noise Reduction, High Precision
