

Mini RG59 Coaxial Cable

Mini RG59 coaxial cable is designed for signal transmission applications. It features a copper conductor, insulation, braided shield, and outer jacket for reliable signal transfer.

Product Overview

Professional Mini RG59 Coaxial Cable

This Mini RG59 Coaxial cable is engineered for high-performance signal sequences in wireless and data communication systems. Featuring a 75Ω impedance, it is ideal for applications requiring reliable data transfer such as CCTV and cable television. Its construction includes high-quality shielding and a flame-retardant jacket to ensure durability and safety in diverse professional environments.

Technical Specifications

Impedance	75 Ω
Operating Temperature Range	-40 to 70 °C
Inner Conductor Diameter	0.81 mm
Insulation Diameter	3.7 mm

Compliance and Standards

Reference Standards

- MIL-C-17
- EN50575
- EN50399
- EN60332-1-2
- EN61034

Flame Retardant Ratings	ETL, UL, CMX, CM, CMR, CATVX, CATV, CATVR, CPR Eca
