

# Mini Rice and Wheat Harvester

This mini harvester is designed for efficient cutting, gathering, and swathing of rice and wheat. Its compact design allows for easy maneuverability in smaller fields, making it suitable for individual farmers and small agricultural businesses.

## ADDITIONAL IMAGES

## Overview

### Compact Harvesting Efficiency

The 4L-0.8B is a specialized full-feeding combine harvester engineered for rice and wheat crops. Designed for efficiency in smaller fields, this compact machine streamlines the harvesting process by integrating cutting, conveying, and swathing into a single operation. It helps agricultural businesses maximize productivity while minimizing grain loss and reducing manual labor requirements.

## Performance Metrics

### Harvesting Productivity

**0.07 hm<sup>2</sup>/h**

Min Productivity

**0.11 hm<sup>2</sup>/h**

Max Productivity

### Fuel Consumption

16.8-19 kg/hm<sup>2</sup>

## Engine Specifications

### Engine Power

8.8 kW

### Engine Speed

2200 r/min

## Technical Details

### Dimensions (L x W x H)

3650 x 1550 x 1550 mm

### Structural Weight

780 kg

## Quality Standards

### Harvesting Quality Metrics

Metric	Maximum Rate
Loss Rate	d 3.0%
Mingled Rate	d 2.0%
Broken Rate	d 1.5%
