

Mini-Split Air Conditioner Wall Mounting Bracket

This heavy-duty metal bracket provides secure wall mounting for mini-split air conditioner outdoor units. It features vibration-dampening rubber pads and an adjustable design for optimal positioning and leveling.

ADDITIONAL IMAGES

Overview

Heavy-duty steel construction ensures long-lasting reliability for outdoor units.

Heavy-Duty Mini-Split Support

This heavy-duty wall mounting bracket is engineered for secure and reliable installation of mini-split air conditioner outdoor units. Featuring a reinforced "U" structure, the bracket provides superior strength and stability for your equipment. Integrated rubber dampers effectively minimize vibration and noise transmission to the wall, ensuring quieter operation. With adjustable leveling features and a corrosion-resistant finish, it offers a durable and professional solution for both residential and commercial HVAC installations.

Technical Specifications

Bolts Connect Bracket

"U" structure makes the beam more stronger, equipped with round rubber damper can reduce the vibration to the wall effectively.

The reinforced 'U' structure provides enhanced strength, while rubber dampers reduce wall vibration.

Equip with Gradienter

Once the bubble is in the middle of the gradienter, your bracket is horizontal

Integrated gradienter ensures precise, horizontal installation for optimal unit performance.

Installation Features

Integrated gradienter • Adjustable M8*42 bolts • Vibration-dampening rubber pads • Pre-drilled holes

Model Specifications

Model	Bottom Bar (mm)	Cross Bar (mm)	Load Capacity (kg)	Net Weight (kg)
HBF-400	400	800	100	3.7
HBF-450	450	800	100	4
HBF-550	550	800	200	5.5
HBF-600	600	1000	200	6

Packaging and Logistics

- Individual carton: 840*70*60mm
- Outer carton: 870*270*160mm (4 sets)
- Pallet: 1150*1150*2100mm (260 sets)
- Pallet Total Weight: 1040kg

Material and Treatment

Zinc-coated steel, Epoxy resin polyester treatment, Corrosion-resistant

Key Performance Metrics

Rubber Pads

The rubber vibration damper can absorb noise effectively.

Rubber pads effectively absorb noise and vibration during operation.

Performance Highlights

200 kg

Max Load Capacity

2 pcs

Adjustable Bolts

9001 RAL
