Product Overview

Professional Mini-Split Mounting Solutions

These heavy-duty wall and roof mounting brackets are engineered to provide secure, long-lasting support for mini-split air conditioning outdoor units. Featuring a robust triangular bar design, these brackets ensure structural integrity and enhanced weight distribution for safe operation. The system includes adjustable mounting options with a built-in 'U' component for precise positioning, making installation adaptable for various residential and commercial requirements.

Technical Specifications

Load Capacity

100 kg

Standard Models (HP047C/HP048C)

200 kg

Heavy Duty Models (HP049C/HP050C)

Model Specifications

Model	Length	Width	Thickness	Net Weight
HP047C	800	500	1.5	5.5
HP048C	800	500	1.5	5.8
HP049C	1000	500	2	7.9
HP050C	1000	550	2	8.8

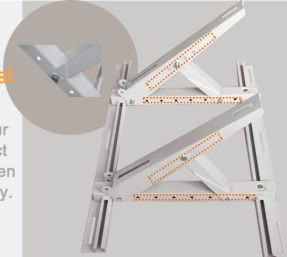

Materials & Finish

Zinc-coated steel, Epoxy resin polyester coating, Corrosion-resistant, RAL 9001 color

Installation & Design

Easy to Adjust

According to your roof angle, select the right hole. Then fix the bolts tightly.

Triangle Bar

Triangle bar design makes the structure more stronger

Bolts Connected Bracket

4 Bolts connected roof bracket, build-in "U" component to make sliding control more easier, once you adjust to the position you need, then fix the bolts tightly.

Key Features

- 4-bolt connection system
- Built-in 'U' component for sliding adjustment
- Triangular bar design for added strength
- Multiple mounting holes for roof angle adaptation
- Corrosion-resistant outdoor treatment
