

Mini Tiller

This mini tiller is a compact and versatile machine designed for small-scale tilling and cultivation tasks. It delivers sufficient power for breaking up soil and preparing seedbeds in gardens, vegetable patches, and flower beds.

Product Overview

Compact Power for Soil Cultivation

The GM400-B Mini Tiller is a compact and versatile machine designed for efficient small-scale tilling and cultivation. Equipped with a robust gasoline engine, it provides reliable performance for breaking up soil and preparing seedbeds in gardens and vegetable patches. Its lightweight construction and narrow profile ensure excellent maneuverability in tight spaces, making it a practical choice for both professional landscapers and home gardeners.
