

# Mini Vacuum Pump for HVAC Refrigeration

This high-performance vacuum pump is designed for applications needing consistent vacuum levels. The mini-series pump features a robust motor, oil-sealed design, and user-friendly operation.

## Product Overview

### High-Performance Mini Vacuum Pump

This mini-series vacuum pump is engineered for superior efficiency and reliability in HVAC and refrigeration maintenance. Featuring a compact, oil-sealed design, it is optimized for easy integration into professional field service or laboratory environments. The unit offers consistent vacuum levels, ensuring high-quality performance and long-term durability for demanding service tasks.

## Technical Specifications

### Performance Features

**4 CFM**

Free Air Displacement (V-1115S-M)

**5 CFM**

Free Air Displacement (V-1215S-M)

**150 Micron**

Ultimate Vacuum

**0.25 HP**

Motor Power

### Model Comparison Table

Specification	V-1115S-M	V-1215S-M
Voltage	220V~/50Hz	220V~/50Hz
Free Air Displacement	4 CFM	5 CFM
Inlet Port	1/4" SAE	1/4" SAE
Oil Capacity	220ml	220ml
Dimensions	260x110x240mm	260x110x240mm
Weight	6.5kg	6.5kg

## General Information

Origin	Made in China
