

# Miniature 1.2GHz Wireless Surveillance Camera

This miniature 1.2GHz wireless camera is designed for discreet surveillance applications. It transmits video signals wirelessly to a compatible receiver, allowing for remote monitoring.

## Overview

### Compact Surveillance Solution

This miniature 1.2GHz wireless camera is engineered for discreet surveillance applications where space is at a premium. Its compact form factor allows for easy concealment in various environments, while the integrated antenna ensures reliable wireless video transmission. Designed for security monitoring and covert operations, this device provides a practical solution for remote monitoring needs.

## Imaging Performance

Imaging Sensor	1/3" CMOS
Horizontal Resolution	380 TV lines
View Angle	62 degrees
Minimum Illumination	1.5 Lux / F1.5
Gain Control	Automatic

## Technical Specifications

### Pixel Resolution

**628 px**

PAL Horizontal

**582 px**

PAL Vertical

**510 px**

NTSC Horizontal

**492 px**

NTSC Vertical

Frequency Range	900MHz ~ 1,230MHz
Transmission Power	10 mW
Modulation Mode	FM
Consumption Current	80 mAh

## Environmental

Operating Humidity	85 % RH
