

Miniature Automotive Bulb

This miniature automotive bulb is suitable for various vehicle lighting applications. It features a robust filament construction for reliable performance and extended lifespan.

Overview

Reliable Automotive Lighting

This miniature automotive bulb is engineered for consistent performance across various vehicle lighting applications. Featuring a robust filament construction, it provides a bright, focused light output designed to enhance visibility and safety on the road. The corrosion-resistant base ensures a durable and secure electrical connection, making it an ideal choice for critical indicator lights.

Technical Details

Design Features

- Robust filament construction
- Corrosion-resistant base
- Focused beam pattern

Performance Benefits

Extended Lifespan • Reliable Connection • Enhanced Visibility

Common Applications

Turn Signals, Brake Lights, Indicator Lights
