

Miniature Circuit Breaker 1P 1-63A 6-10kA

This is a high-performance miniature circuit breaker (MCB) designed for reliable protection in electrical circuits. The 1-pole MCB is rated for 230/400VAC operation and has a breaking capacity of 10000A.

Product Overview

High-Performance Miniature Circuit Breaker

This miniature circuit breaker is engineered for reliable terminal distribution in commercial, industrial, and residential environments. It provides essential overload and short-circuit protection while enabling infrequent switching operations. Designed for safety and versatility, the unit features finger-touch protection terminals and clear contact status indicators.

Electrical Ratings

Breaking Capacity

10 kA

Max Breaking Capacity

Rated Current	63 A
Rated Voltage	230 / 400V
Frequency	50 / 60 Hz

Technical Specifications

Front Face Configuration

- Flat
- Rocker (without label cover)
- Rocker (with label cover)

Number of Poles	1
