

Miniature Circuit Breaker

Miniature circuit breakers (MCBs) are designed for overload and short-circuit protection in electrical installations. They are rated for 230/400V AC voltage and have a 6000A breaking capacity.

Product Overview

Reliable Circuit Protection

These miniature circuit breakers are engineered to provide robust overload and short-circuit protection for electrical installations. Designed for versatility, they support single, double, and triple pole configurations to suit various electrical setups. With a breaking capacity of 6000A, they are a dependable choice for residential, commercial, and industrial applications.

Technical Specifications

Pole Configurations

- Single Pole
- Double Pole
- Triple Pole

Rated Voltage	230/400V AC
Breaking Capacity	6000 A

Compliance & Standards

Standards	IEC60898-1, GB10963
-----------	---------------------

Application

Suitable Environments

Residential • Commercial • Industrial
