

# Miniature Circuit Breaker

This miniature circuit breaker offers a high breaking capacity of up to 6kA. It features a contact position indicating window for enhanced safety and is constructed with PA66 nylon for flame retardancy and impact resistance.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Circuit Protection

This miniature circuit breaker provides automatic protection against electrical overloads and short circuits. Engineered with high-quality, flame-retardant PA66 materials and a robust internal arc chamber, it ensures safety and durability in demanding electrical environments. Its innovative design features a 1P+N configuration, high breaking capacity, and clear contact position indicators for enhanced operational visibility.

## Performance Metrics

### Breaking Capacity

**10000 A**

Breaking Capacity

### Rated Voltage

**230 V**

Voltage

## Technical Specifications

### Protection Functions

- Overload protection
- Short circuit protection
- Leakage protection

### Standards

IEC60898-1

### Materials

PA66 Nylon, Q195 Steel, Zinc Coated, Aluminum Rivets

## Design & Features

### Key Features

- 1P+N Configuration
- 18mm Module Width
- Contact position indicating window
- Magnetic blow-out arc extinguishing
- Flame retardant shell
