

Miniature Circuit Breaker for Electrical Protection

This miniature circuit breaker is designed for electrical protection in residential and commercial applications. Rated for 1500W at 240V, with a sensitivity of I_n d30mA, this MCB ensures safety and reliability in electrical circuits.

Overview

Reliable Electrical Protection

This miniature circuit breaker (MCB) is engineered to provide robust electrical protection for both residential and commercial environments. It features a compact design with a thermal-magnetic trip mechanism, ensuring consistent performance against overloads and short circuits. Equipped with an ON/OFF indicator and a dedicated test button, this device offers users easy functional verification and enhanced safety for electrical circuits.

Technical Specifications

Rated Power	1500 W
Rated Voltage	240 V
Sensitivity (I _n)	30 mA
Trip Time	d0.5

Features

Safety Features

- ON/OFF Indicator
- Functional Test Button

Protection Types	Overload Protection, Short-Circuit Protection
Trip Mechanism	Thermal-magnetic
