Overview

Reliable Circuit Protection

The DZ47-63 miniature circuit breaker is designed for robust overload and short-circuit protection in electrical distribution systems. It is suitable for AC 50/60Hz circuits, supporting 230V for single-phase and 400V for multi-phase configurations. This versatile device is ideal for domestic, commercial, and industrial applications, ensuring safety and reliable performance.

Technical Specifications

Rated Current

63 A

Maximum Rated Current

Breaking Capacity

- 4000
- 6000

Voltage Rating

230V (Single Phase), 400V (2, 3, 4 Phases)

Operating Frequency

50/60Hz

Compliance & Standards

Compliance Standards

IEC/EN60898-1 • GB10963.1

Tripping Characteristics

- C6
- C16
- C63

Features

Mounting

DIN rail

Status Indicators

Yes
