

Miniature Circuit Breaker for Overcurrent Protection

This miniature circuit breaker is designed for electrical protection. It provides overcurrent and short-circuit protection in residential, commercial, and industrial applications.

Product Overview

Compact Electrical Protection

This miniature circuit breaker (MCB) is engineered for reliable overcurrent and short-circuit protection across residential, commercial, and industrial electrical systems. Its compact, space-saving design facilitates easy installation on standard DIN rails. The unit features a manual toggle switch for convenient operation and provides clear visual indication of the circuit status.

Technical Specifications

Rated Current

16 A

Rated Current

Breaking Capacity	6000 A
Model Identifier	HS45B

Installation & Design

Mounting Type	DIN Rail
Design Features	Compact Design, Toggle Switch, Visual Status Indication

Application

Suitable Applications

- Residential Electrical Systems
- Commercial Buildings
- Industrial Installations
