

Miniature Circuit Breaker for Overload and Short-Circuit Protection

Miniature circuit breaker (MCB) designed for overload and short-circuit protection in electrical circuits. It is available in single, double, and triple pole configurations and features a trip indicator and high breaking capacity.

Product Overview

Reliable Circuit Protection

This miniature circuit breaker (MCB) is engineered to provide essential overload and short-circuit protection for electrical systems. Designed for versatility, it supports single, double, and triple pole configurations to suit various installation requirements. With a robust breaking capacity and strict adherence to international safety standards, it is a dependable choice for residential, commercial, and industrial electrical infrastructure.

Technical Specifications

Pole Configurations

- Single Pole
- Double Pole
- Triple Pole

Rated Voltage	400 V
Breaking Capacity	10000 A
Standards Compliance	IEC60898

Features

Key Features

Overload Protection • Short-Circuit Protection • Trip Indicator • High Breaking Capacity

Applications

Suitable Applications

- Residential
- Commercial
- Industrial
