

Miniature Circuit Breakers for Overcurrent Protection

Miniature circuit breakers (MCBs) are designed for overcurrent and short-circuit protection in electrical circuits. They protect wiring and equipment from damage caused by excessive current flow in residential, commercial, and industrial applications.

Overview

Reliable Circuit Protection

These miniature circuit breakers (MCBs) are engineered to provide robust overcurrent and short-circuit protection for electrical systems. Designed for versatility, they are suitable for a wide range of residential, commercial, and industrial applications to safeguard wiring and equipment. The units feature a user-friendly toggle switch for manual operation and comply with strict IEC standards to ensure consistent safety and performance.

Electrical Specifications

Voltage Rating	230 V
Maximum Voltage Rating	400 V
Rated Current	20 A

Performance

Breaking Capacity	3000 A
